**HRH King Salamn bin Abdulazizi AlSaud**  
Custodian of the Htow holy Mosques

**HRH Prince Mohammad bin Salman Al Saud**

Deputy crown Prince second Deputy Prime Minister

## The Minister Message

---

Dr. Tawfiq **Al-Rabiah**

**Scientific research** is an important tool to improve human life. Investment in health research has positive impact in five areas; advancing knowledge, building capacity, informing decision making, improving health, health system outcomes and contributing to the economy.

Saudi Arabia is trying to increase the level of research cooperation over all institutions belonged to either governmental or non-governmental sector, and assign it as a long-term aim due to the necessity to consider public expectations and public engagement. Yet, collaboration between them through data, best practice and resource sharing is uncommon.

This is of particular importance because of the increasing recognition that inter-institutional and inter-disciplinary research collaboration is essential to fully address complex health and healthcare issues.

The General Directorate of Research and studies (GDRS) undertook the responsibility to deal with the former fragmented and poorly coordinated MOH research system. Consequently, it adopted a national strategy and implementation roadmap to upgrade research infrastructure redesign the health research landscape across MOH and develop a research support framework.

It announced launching a regional research departments operational plan, defined a package of relevant initiatives and identified & implemented a set of projects.

GDRS accomplished the following programs :

- ↘ *Covering health affairs directorates all over the Kingdom with Institutional Review Boards (IRBs).*
- ↘ *Unifying their organizational structure.*
- ↘ *Arranging to put e-Review technique into action.*
- ↘ *Standard operational Procedures (SOPs) & formats.*
- ↘ *Organizing reporting and adopting structural interaction approaches in terms of formalized networks and platforms.*
- ↘ *Ddefining missions & responsibilities.*

Lastly, I would like to acknowledge the contribution of IRB committees representatives all over MOH for their devoted efforts to develop the quarterly and annual research reports.

## The Director Message

# WHO ARE WE

**The General Directorate for Research and Studies** (GDRS MOH) is a specialized unit that directly **responsible** for the management of technical, administrative and financial activities of MOH research projects.

The unit is **linked** with the assistant undersecretary for **planning** and **research**.

**GDRS** acts in collaboration with the scientific committee, ethical committees and Committee for the **Adoption** of Research Priorities within the MOH.

The **GDRS** promotes equitable and sustainable health developments across the Kingdom.

Following the standard scientific and ethical principles :

### **TEAMWORK**

GDRS cooperates with other national and international health research bodies and is committed to the overall national health research objectives and agendas.

### **ACCOUNTABILITY**

GDRS is responsible for the achievements and successes of health research to develop health care services.

### **INTEGRITY**

GDRS guidelines demonstrate honest scientific and ethical framework coupled with a high moral standard widely trusted and culturally respected.

### **EXCELLENCE**

We are committed to achieving the highest level of excellence in conducting basic and applied health researches.

### **RESPECT**

We foster an environment of mutual respect and trust amongst ourselves and with all whom we serve.

### **COLLABORATION**

GDRS cooperates with other health community partners and stakeholders for different health problem issues.

### **LEADERSHIP**

GDRS as a representative of MOH understands, accepts and supports the health research and fosters values consistent with the aforesaid mission in the KSA.

# VALUES

# MISSION

**A COMPREHENSIVE  
MANAGEMENT OF HEALTH  
RESEARCH AT THE  
MINISTRY OF HEALTH  
TO CARRY OUT HIGH STANDARD  
RESEARCH PROJECTS  
CONSISTENT WITH THE  
MINISTRY OF HEALTH RESEARCH  
PRIORITIES THAT LEAD TO THE  
DEVELOPMENT OF CLINICAL  
PRACTICE AND BRIDGING THE  
KNOWLEDGE GAP.**

**TO BE A LEADER  
IN THE FIELD OF  
HEALTH RESEARCH  
AND STUDIES,  
AIMING TO THE  
EXCELLENCE IN  
COGNITIVE CONTRIBUTION  
FOR THE  
MINISTRY OF HEALTH  
NATIONALLY, REGIONALLY  
& GLOBALLY.**

# REPORT OF GDRS ROLE FOR 2018

The general directorate for research and studies adopts the responsibility of management for the health research system at ministry of health to achieve high quality health researches, compatible with the research priority setting and lead to the outputs, which will participate in developing the clinical practicing ,bridging the knowledge gab by constellation of experts in different researches fields.

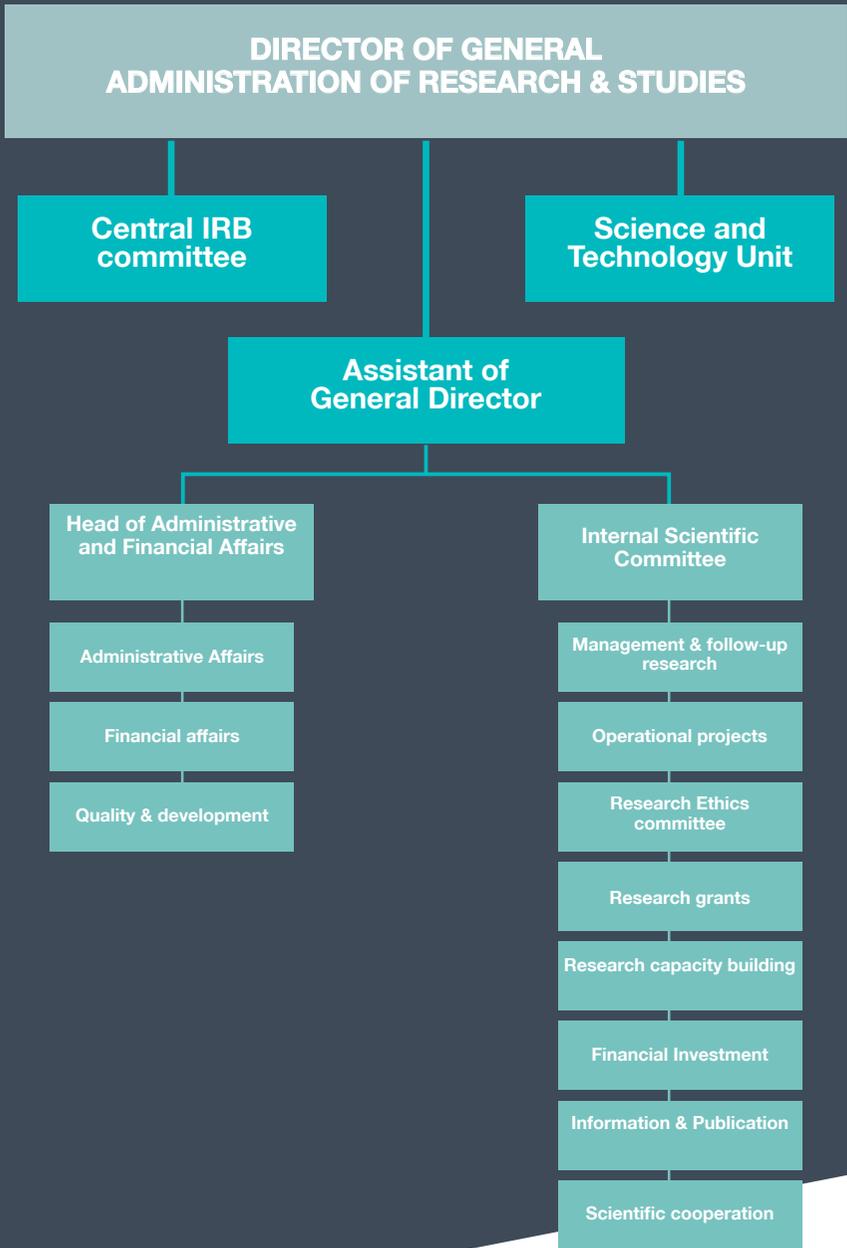

From that prospective, the Number of (clinical &non-clinical) reviewed and approved researches by the IRB committees at ministry of health in 2018G are 1522 researches, an increase of 432 researches over the previous 2017G.

This growth is a result of increasing the local IRB committees to be registered new 8 committees within the previous two years, the total number of IRB-MOH committees are 22 committees registered in KACST.

#### **Standard operating procedures (SOPs) Project:**

the project of Standard operating procedures (SOPs) for the IRB committees which aiming to facilitate, unify reviewing and approving the researches by IRB committees at MOH according to the international criteria for the ethical approval, and application the ethical rules , which issued by KACST, guarantee protection of rights, safety and welfare of the participants in the researches and clinical studies.

These mentioned projects and ambitious initiatives aiming to set up and progress a research harmonized sustainable environment, development capabilities of the administration and raising efficiency performance for managing high quality researches and could cover all health fields and targeting the recruitment of researches for bridging the knowledge gab In addition to that, it will contribute in developing the clinical researches and finding solutions of efficient safe health system, which could support the national transformation and realization of vision 2030.

# IRB

## COMMITTEES IN

# KING SAUD MEDICAL CITY (KSMC)

The committee was officially formed (26-02-2015) and recognized by Ministry of Health (19-04-2016), with IRB registration at KACST (H-01-R-053) issued on 04-05-2015.

The IRB as an independent committee has the authority to evaluate the scientific aspects of clinical research proposals, involving human subjects that caters both the KSMC and non-KSMC researchers in local and international.

The total number of projects processed since 01.01.2018 is 123.

# IRB

## COMMITTEES IN

# KING KHALED EYE SPECIALIST HOSPITAL (KKESH)

The Hospital Institutional Review Board (IRB) was established in 1984 to ensure that:

- KKESH maintains the highest possible standards in all aspects of human investigation studies.
- KKESH can collaborate at the same level with investigators at the institutions of excellence around the world.
- KKESH investigators can publish the results of their studies in peer-reviewed, indexed medical journals.

The total number of projects processed since 01.01.2018 is 116.

# IRB COMMITTEES IN SPECIALIZED MEDICAL CENTER (SMC)

In 2015, the SMC Institutional Review Board the local research ethics committee authorized to perform a complete and sufficient evaluation of all research projects conducted by this institution was officially registered in National Committee of Biomedical Ethics (NCBE), Kingdom of Saudi Arabia with IRB KACST Registration No. H-01-R-056

The committee is comprised of people with diverse professional backgrounds with adequate qualifications, expertise in research and understanding of the Saudi culture and traditions.

SMC IRB has been conducting review and approval of research studies and ensuring that studies comply with institutional commitments and regulations, applicable laws, professional conducts and ethical practices particularly in safeguarding the rights and welfare of human subject

The total number of projects processed since January 1, 2018 is 15.

## COMMITTEES IN MAKKAH HEALTH AFFAIRS GENERAL DIRECTORATE

In compliance with the provision and law of the ethics on human subject regulations and bio/medical research roles at the MOH.

In consistency, the General Directorate of Health Affairs of Makkah Region (GDRM) has established and registered an IRB on January 2018.

the IRB conducts ethical reviews for submitted research proposals from professionals (practitioners and researchers) and monitors approved study projects to ensure that they are conducted in accordance with the provisions of the law of ethics of research on living creatures and follow the guidelines of NCBE.

The total number of projects processed since 01.01.2018 is 77.

## COMMITTEES IN INTERNATIONAL MEDICAL CENTER IMC - JEDDAH

IMC IRB was established on 2010 to serve the biomedical research needs of International Medical Center physicians and internship students.

IRB is a committee board where the Prospective or Retrospective Research proposals are peer reviewed according to its ethical, feasible and financial merits.

IMC IRB is recognized by National Committee for Medical and Bioethics under King AbdulAziz city of Science and technology (KACST),Riyadh.

## COMMITTEES IN ALQASSIM HEALTH AFFAIRS DIRECTORATE

Established in 2008 and currently registered at the national bioethics committee, registration No. H-04-Q-001.

The main actively working research ethics committee in Qassim Reviews almost all research proposals in the region.

Most of proposals come from Qassim University, and majority are from students and interns.

The total number of projects processed since 01.01.2018 is 131.

## COMMITTEES IN KING FAHAD SPECIALIST HOSPITAL-DAMMAM (KFSH)

The IRB is a committee of scientists, non-scientists, community representatives and health care professionals.

It reviews research studies in an effort to protect the rights, safety and well-being of research participants and ensure the integrity and confidentiality of their information.

In addition to documenting information needed by patients or healthy volunteers to enable them to make informed decisions on whether to participate in a research or not.

IRB at KFSH in Dammam is registered locally by the Saudi National Commission for Bioethics (NCBE) with the number H-05-D-002 and dated 04/06/1432 AH.

It operates according to NCBE regulations, Good Clinical Practice Guideline (GCP) and the Association for accreditation of Human Research Protection Programs (AAHRPPInc®) standards, which has granted the hospital accreditation in 2014 and renewed it in 2017.

The total number of projects processed since 01.01.2018 is 32.

## COMMITTEES IN SAUD ALBABAIN CARDIAC CENTER DAMMAM (SBCC)

Saud Al Babtain Cardiac Center IRB Committee was established on January 2015 and its primary function is to assure that the rights and welfare of human subjects are protected before, during, and after their participation in clinical studies through conducting initial protocol review, ongoing review, and monitoring adverse events.

The IRB Committee serves and abides in accordance with the National Committee of Bio Ethics (NCBE) policies and International Council for Harmonization of Technical Requirements for Pharmaceuticals for Human Use – Good Clinical Practice (ICH - GCP) guidelines.

The total number of projects processed since 01.01.2018 is 22.

## COMMITTEES IN JAZAN GENERAL HOSPITAL

---

Jazan hospital IRB  
established in 2017.

It serves all researchers in Jazan region  
including students and health workers,  
especially who will conduct their  
research in Jazan hospital.

It reviews all research proposals that  
are submitted for approval with  
providing comments and  
recommendations to improve the  
quality and methods of research.

It also observes and monitors the  
process of applying research steps  
even after publication.

The total number of  
projects processed  
since 01.01.2018 is 52.

## COMMITTEES IN JAZAN GENERAL HOSPITAL

Jazan hospital IRB established in 2017. It serves all researchers in Jazan region including students and health workers, especially who will conduct their research in Jazan hospital.

It reviews all research proposals that are submitted for approval with providing comments and recommendations to improve the quality and methods of research.

It also observes and monitors the process of applying research steps even after publication.

The total number of projects processed since 01.01.2018 is 52.

# GDRS

## ACTIVITIES AND PROJECTS

### The General Directorate of Research and Studies (GDRS) launches an ambitious accelerated roadmap to enhance research findings informed policy (RFIP) in MoH, KSA through 4 strategic objectives:

- 1) Developing awareness and creating commitment to improve the culture for and practice of RFIP through its implementation.
- 2) Building national RFIP capacities for the implementation of MoH Health transformation program 2020 and related national health research agendas. That includes a package of ongoing research services, awards, events and incentives programs as follows:
  - ↳ Developing Electronic Health Research Database (Marifah) initiative, and awarding researchers & users Continuing Medical Education (CME) hours.
  - ↳ Developing unified electronic review (e review) initiative program for health research proposal; submission, reviewing for granting approval to be implemented in MoH facilities.
  - ↳ Developing standard operating procedures (SOPs) for MoH central and local ethical committees which expands to cover currently 80% of MoH Health regions, GDRS targeted covering 100% coverage within the coming period.
  - ↳ Preparing for setting of MoH health research priority setting agenda

- ↳ Integrating health research and knowledge translation performance indicators into CBAHI Standards for health care facilities accreditation.
  - ↳ Providing MoH employees; research editing, publication, and consultation services.
  - ↳ Preparing for holding MoH research conference and granting a set of research prizes.
  - ↳ Initiating collaboration with national academic institutions. Fostering health research funding sources Health research capacity building.
  - ↳ Establishing MoH researcher's networks.
  - ↳ Supporting and governing community and voluntary participation in health research.
  - ↳ Holding the First Scientific Research Week in 20 -25 /8/1439 H. \*6-10/5/2018 G
  - ↳ Study research opportunities within the framework of applying an action plan for implementation of all health-related aspects of SDGs by 2030, as health is one of the keys to achieving these goals worldwide. In accordance with Declaration G20 Meeting of Health Ministers» October 4th 2018, Argentina summary file.
- 3) Establishing national networks of excellence and sharing best practices in RFIP
  - 4) Developing, using and evaluating tools and mechanisms to support RFIP
