

General Department of Research & Studies

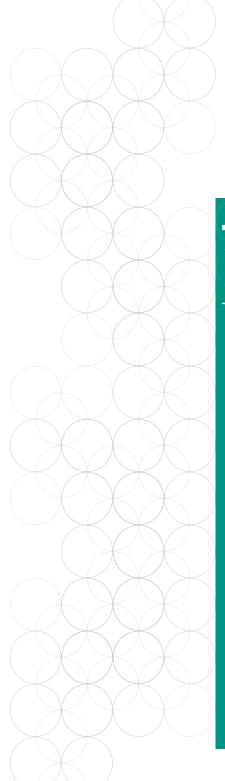

The Minister Message

Dr. Tawfiq Al-Rabiah

Scientific research is an important tool to improve human life. Investment in health research has positive impact in five areas; advancing knowledge, building capacity, informing decision making, improving health, health system outcomes and contributing to the economy.

Saudi Arabia is trying to increase the level of **research cooperation** over all institutions belonged to either governmental or nongovernmental sector, and assign it as a long-term aim due to the **necessity** to consider public expectations and public engagement. Yet, collaboration between them through data, best practice and resource sharing is **uncommon**.

This is of particular importance because of the increasing recognition that inter-institutional and inter-disciplinary research collaboration is **essential** to fully address complex health and healthcare issues.

The Director Message

Ph. Athari Alotaibi

The General Directorate of Research and studies (GDRS) undertook the responsibility to deal with the former fragmented and poorly coordinated MOH research system.

Consequently, it **adopted** a national strategy and implementation roadmap to; upgrade research infrastructure, redesign the health research landscape across MOH and **develop** a research support framework.

It announced launching a **regional research** departments, operational plan, defined a package of relevant initiatives and identified & implemented a set of projects.

GDRS accomplished the following programs:

- •Covering health affairs directorates all over the Kingdom with Institutional Review Boards (IRBs).
- •Arranging to put e-Review technique into action.
- Organizing reporting and adopting structural interaction approaches in terms of formalized networks and platforms.
- •Unifying their organizational structure.
- •Standard operational Procedures (SOPs) & formats.
- •Ddefining missions & responsibilities.

Lastly, I would like to acknowledge the contribution of **IRB committees**' representatives all over **MOH** for their devoted efforts to develop the quarterly and **annual research reports**.

WELCOME to the final **Annual Scientific Report** for General Directorate for Research and Studies

at Ministry of Health

(GDRS-MOH)

REVIEW BOARD

ORGANIZATIONAL STRUCTURE OF THE GENERAL ADMINISTRATION OF RESEARCH & STUDIES

WHO ARE WE?

The General Directorate for Research and Studies (GDRS MOH) is a specialized unit that directly responsible for the management of technical, administrative and financial activities of MOH research projects.

The unit is **linked** with the assistant undersecretary for **planning** and **research**.

GDRS acts in collaboration with the scientific committee, ethical committees and Committee for the **Adoption** of Research Priorities within the MOH.

VALUES

The **GDRS** promotes equitable and sustainable health developments across the Kingdom

Following the standard scientific and ethical principles:

ACCOUNTABILITY

GDRS is responsible for the achievements and successes of health esearch to develop health care services.

TEAMWORK

GDRS cooperates with other national and international health research bodies and is committed to the overall national health research objectives and agendas.

INTEGRITY

GDRS guidelines demonstrate honest scientific and ethical framework coupled with a high moral standard widely trusted and culturally respected.

COLLABORATION

GDRS cooperates with other health community partners and stakeholders for differen health problem issues

RESPECT

We foster an environment of mutual respect and trust amongst ourselves and with all whom we serve.

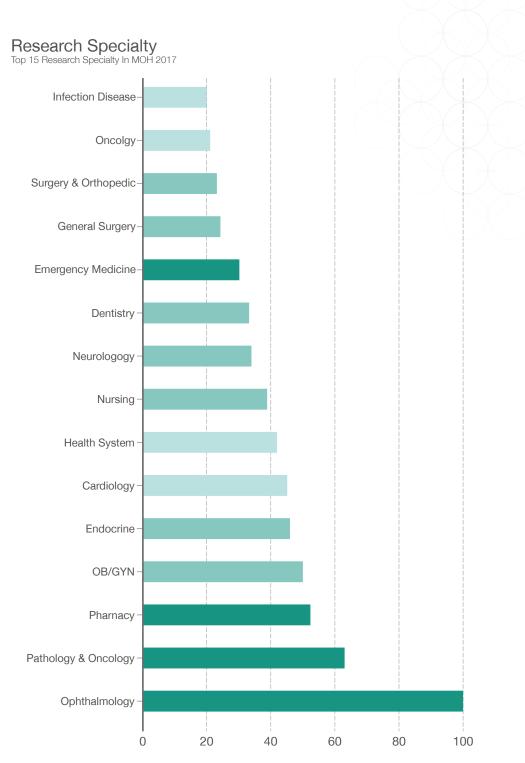

EXCELLENCE

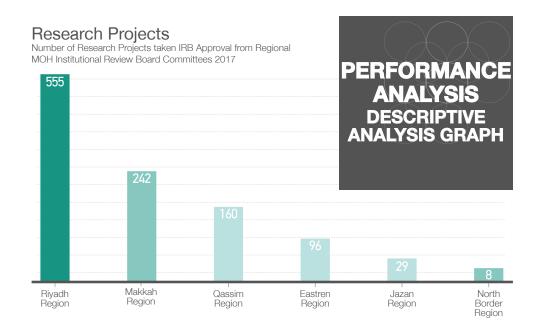

We are committed to achieving the highest level of excellence in conducting basic and applied health researches.

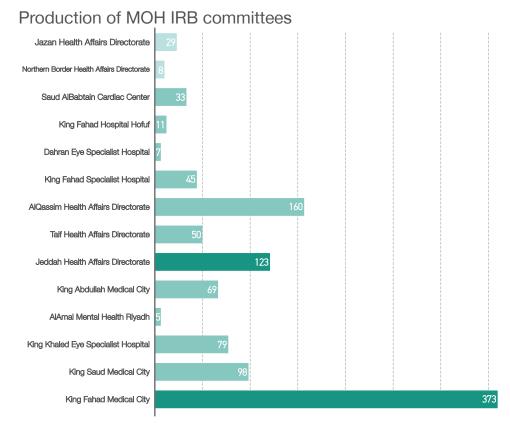

LEADERSHIP

GDRS as a representative of MOH understands, accepts and supports the health research and fosters values consistent with the aforesaid mission in the KSA.

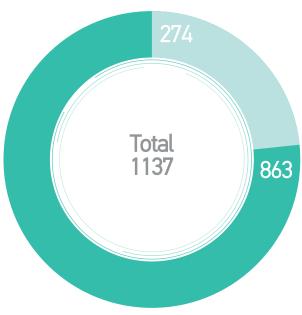

Nationality

863 76% Saudi

274 24% Non-Saudi

Classification

Researcher / Assistant Professor

12 Junior Researcher

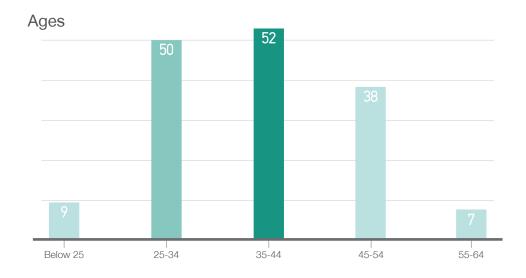

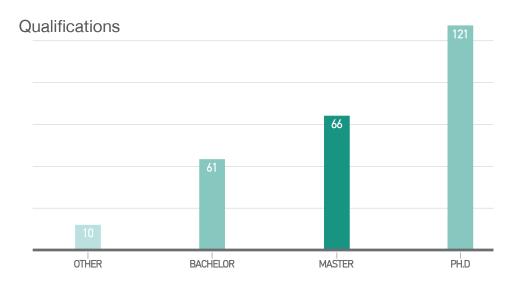

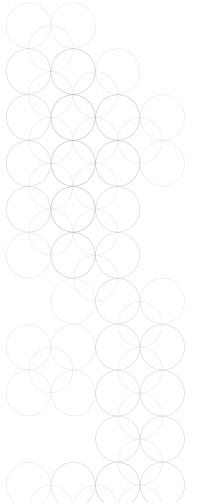

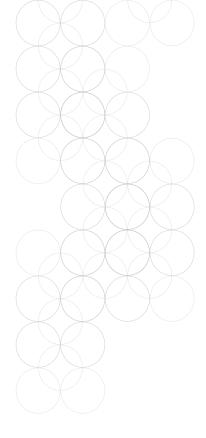

IRB COMMITTEES

in Riyadh Region

IRB at KFMC was established in 2007.

It approves epidemiological, scientific, and clinical protocols for KFMC, MOH hospitals, and universities (inside and outside the Kingdom).

It also follows up, audits, and monitors the performance of the research.It approves manuscripts before submission to journals.

The total number of projects processed since 01.01.2018 is 986.

IRB COMMITTEES

in Eastern Region

The IRB is a committee of scientists, non-scientists, community representatives & health care professionals.

It reviews research studies in an effort to protect the rights, safety and well-being of research participants and ensure the integrity and confidentiality of their information. In addition to documenting information needed by patients or healthy volunteers to enable them to make informed decisions on whether to participate in a research or not.

IRB at KFSH in Dammam is registered locally by the Saudi National Commission for Bioethics (NCBE) with the number H-05-D-002 & dated 04/06/1432 AH.

It operates according to NCBE regulations, Good Clinical Practice Guideline(GCP) & the Association for accreditation of Human Research Protection Programs (AAHRPPInc®.) standards, which has granted the hospital accreditation in 2014 and renewed it in 2017.
