RHDs & Clusters Governance Manual

Created by : RHD 2.0 TEAM

Version 1

Introduction:

Governance is a set of laws, rules and procedures that aim to achieve quality and excellence in performance by choosing the correct and effective methods for managing organizations and achieving their goals. Furthermore, It is the adoption of a specific system to control the relationships between the primary parties (RHDs & Clusters) that affect the performance of organizations, which helps to organize work and determine responsibilities to achieve long-term goals.

Outlook:

Purpose

- To Provide a combined Governance Manual and Clusters Also to Identify ,for, RHD2.0 relationships and intersections between RHD and clusters

Objective

- The Combined manual will play as a blueprint guideline for involved stakeholders covering all aspects of Governance
- Clarifying the relationship between these entities in terms of their current & future status during the transformation

Coverage

- Cover key domains in the transformation journey such as function migration and Migration between regarded entities
- activities 1 Cover Pre-Day
- activities 1 Cover post Day

Note: RHD and Governance manual is an alive document and subject to modifications along the transformational journey.
